

FREEDOM™ CONSOLE

Console and Technical Furniture solutions for the fast pace of 24/7 Command Centers and Mission Critical Operations Centers.

“The team at Constant has a strong depth of knowledge of mission critical environments and an unequalled level of customer service. They build relationships that ensure clients will utilize their expertise for future operations center integrations.”

-Akamai Technologies

DESIGNED FOR SUPERIOR FUNCTIONALITY AND AESTHETICS

Constant Technologies’ console systems are designed for the functionality necessary in a command and control environment. Our ergonomically designed consoles efficiently accommodate all your operator equipment and cabling to turn your operations into a clean, clutter-free environment.

We also understand that change is inevitable, so we design our modular consoles for future equipment changes and reconfigurations of your mission critical facility.

The Freedom is Constant’s adjustable worksurface console. Offered in a wide range of colors and accessory options, Constant’s consoles are a key component of your mission critical facility.

FREEDOM™ CONSOLE

Each operations center is unique, and the Freedom Console can be customized to your exact requirements. The team at Constant can help you to analyze your needs and develop the perfect solution for your operators, combining durability and flexibility.

A. Adjustable height work surface with impact-resistant urethane edging provides durability and comfort

B. Full depth work surface offers plenty of space for peripherals like keyboards, mice and phones

C. There are a variety of storage options available to fit the operator's needs

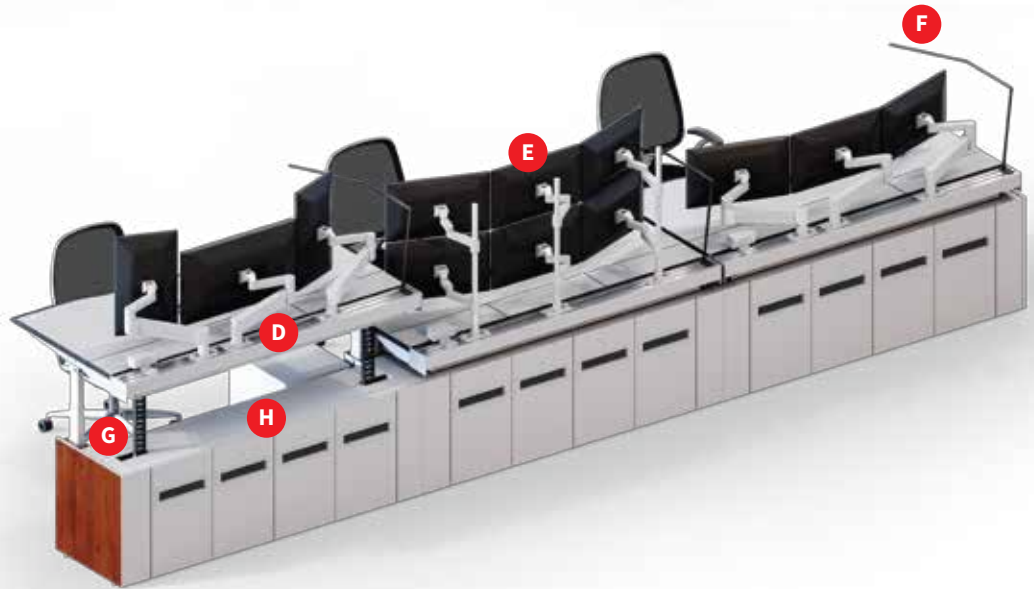

D. Standard 3" horizontal beam toolbar at the rear that accepts industry standard monitor arms and accessories

E. Monitor arms are available to accommodate a wide array of sizes and configurations

F. Task lighting can be integrated and mounted to horizontal beam toolbar or optional slatwall

G. Cable chains allow for efficient vertical cable management throughout the motion of the sit-to-stand worksurface

H. Removable cover plates provide easy access to interior wire trays and equipment

- Cable Management
- Superior Aesthetics
- 24/7 Durability
- Internal Cooling
- CPU/Equipment Enclosures

I. Optional rear slatwall accepts industry standard monitor arms and accessories

J. End Panels are available in a wide array of colors and wood finishes

K. Console includes removable bi-fold doors for full cabinet enclosure

L. Louvered grills in doors come standard, and internal fans can be added for additional ventilation

M. Wedges can be integrated at a variety of degree angles for a curved configuration (5 standard options as well as custom angles available)

N. All doors come standard with locks to safeguard enclosed equipment

The Freedom Console has many standard options and accessories as well as custom options, widths, depths, and heights making it adaptable and customizable to your environment.

THE INNER WORKINGS OF THE FREEDOM

When designing the Freedom, the engineers at Constant carefully considered cable management, equipment access and power/data requirements. The result is a console that can be modified for future growth, allowing your console to adapt with your operations.

M. Slide-out CPU shelves allow easy access to equipment from either side of the console

N. A spline can be added to the rear of the console which allows for increased cabinet depth or can act as a back-to-back console attachment point

O. Cable brush allows for exterior cabling to enter the internal raceways

P. Infill panels on the rear of the work surface can be removed to access optional power strips and connectivity interface panels

Q. Wire trays allow for increased cable management and continuous runs throughout the length of the console

R. Optional Connectivity Interface Panel allows easy access to all low voltage connections

S. Cable chains allow for efficient vertical cable management throughout the motion of the sit-to-stand worksurface

Standard Laminates

“We found Constant committed to quality in design, construction and service of their products. We were impressed with their concept, design and deployment as well as their awareness of our command center needs.”

- Citi

Vertical and horizontal surfaces can be specified from a wide range of laminates. We are able to utilize a variety of vendors including Wilsonart, Formica, Nevamar and Pionite. Included are our standard finishes but other samples can be furnished upon request.

For metal components, there are many standard powder coat finishes available to blend with laminate selection. The standard finish for aluminum components is clear anodized.

UNMATCHED EXPERIENCE

Constant Technologies provides technology furniture and audio/visual solutions for command center environments in the public and private sectors. With decades of experience and installations around the world, we understand the rigorous requirements of an operations center.

- AIA Certified Design Staff
- CTS-D Accredited A/V Designers
- Project Managers
- Programming/Software Engineers
- Installation Technicians
